Subject index

#2 $^1A_g^-$ state 1, 11
#1 $^1B_u^+$ state 1, 11
Absorption
– cross-section 297
– triplet–triplet 297
Aggregates 39, 51
Antenna 1, 29, 51, 79, 139
– peripheral 99
Auger recombination 275

Bacteria
– green photosynthetic 29, 51
– photosynthetic 139
β-carotene 11, 111
Bilin 21

C-phycocyanin 29
Charge transfer 215
Chelates 237
Chiroptical activity 249
Chloroplast 119
Chlorosome 51
Chrysophyte 99
Circularly polarized luminescence 249
Color centers 209
Core antenna complex 79
Core hole kinetics 275
Covalency effects 341
Cross luminescence 275
Cross relaxation 175
Cryptomonad 21
Crystal
– field and second nearest neighbors 341
Cyanobacteria 21, 91
Cytochrome b559 111

Defect center 231
Disordered systems 293
Double-flash measurement 67
Dual emission 11

Electro-absorption 39
Electron
– transfer 39, 79, 111, 119, 215
Energy transfer 1, 11, 21, 51, 91, 139, 189
– in glasses 189
Excimer formation 197

Excitation
– spectra 149
Excited state
– absorption 297
Exciton
– dynamics 293
– luminescence 157
– self-trapping 167
Exciton, migration and trapping 139
Exciton–phonon interaction 167, 197
Excitons 157, 167, 197, 293
– Frenkel 293
– localized 157
– self-trapped 167

Fluorescence 1, 11, 21, 29, 51, 67, 79, 91, 149, 175, 189, 223, 283, 315, 335
– decay dynamics 293
– delayed 111, 139
– induction 67
– lifetime 197, 269, 315
– line narrowing 237
– pH dependence 315
– polarized 21, 29
– quenching 79, 119
– spectroscopy 11, 21, 29, 91
